JUNREY DUCAY

M365 & POWER PLATFORM DEVELOPER

PROFILE

Microsoft 365 and SharePoint Developer with 9 years of experience building business apps, automating approvals, and integrating enterprise systems. Experienced in full-cycle delivery, production deployments, and user support for international teams.

WORK EXPERIENCE

Le Cordon Bleu — Dec 2024 - Present
SharePoint Power Platform Specialist

- Develop and support multi-campus PO Apps for Paris, London, Australia, New Zealand, and Hubs.
- Build Power Apps, SharePoint, and automated approval flows integrated with Xero and Business Central
- Delivered NZ production go-live and support; now assist on ERPNext / Frappe HR workflows and APIs.

Pacer Solutions — May 2024 - Dec 2024
Microsoft 365 Developer

- Built SharePoint Online / SPFx customizations and Power Apps business tools.
- Developed Outlook add-ins and Microsoft 365 workflow integrations.
- Integrated SharePoint and Power Apps with Xero using custom connectors and REST APIs.

Accenture — Sep 2023 - May 2024
Application Development Senior Analyst

- Developed a Power Apps Incident Management System, including forms, business logic, data handling, and user access.
- Built multi-level approval workflows in Power Automate and Power BI reports to track incidents, approval status, and operational data.

Gallium31 Corporation — Aug 2021 - Sep 2023
IT SharePoint Developer

- Built RFID tracking and insurance applications using Power Apps, SharePoint, and Power Automate.
- Enhanced PHP-based Yarda systems and created Power BI reports.
- Implemented business rules, form validations, and automated approval processes to improve application workflows.

Viseo — Mar 2021 - Aug 2021
SharePoint Developer

- Modernized SharePoint publishing sites (Bootstrap 3 to 4) and addressed XSS issues.
- Enhanced SharePoint approval processes and client-specific site functionality.
- Maintained SharePoint publishing sites and delivered custom enhancements based on client business requirements.

House of IT — Aug 2018 - Mar 2021
SharePoint Developer

- Developed SharePoint sites, custom web parts, and collaboration tools.
- Supported business users and trained the TQM team in site administration.
- Recreated legacy system interfaces in SharePoint 2013 to improve usability and performance.
